

Upatex™ HA

Hevea latex is a natural latex in liquid form (Latex) for the use in various industries, but principally for use as binder in adhesives systems.

Hevea latex is centrifuged after collection and stabilized with ammonia, resulting in a product with a high rubber content and good storage stability.

Typical Properties

Parameter	Upatex™ HA
Solid content (w/w %)	61.5
Natural rubber content (w/w%)	60
NH ₃ (w/w%)	0.7
Mechanical stability after production (sec)	900
Coagulate content (w/w% on dry content)	0.05
KOH-number	0.6
Color	white
Transparency of film	clear

Classification

CAS-Nr.:	9006-04-6
EINECS-Nr.:	232-689-0

Packaging, storage

Standard packaging: 1000lt IBC

Upatex™ LA is sensitive to frost and should therefore be stored frost-proof. May be stored for up to six months in original, unopened container.
